

GAUTAM CHOPRA

gautamchopra7519@gmail.com | Pune, India | [LinkedIn](#) | [GitHub](#) | Portfolio

PROFESSIONAL SUMMARY

B.Tech CSE (AI & ML) student at Vishwakarma Institute of Technology, Pune, and full-stack developer who builds AI-powered products and data-driven applications. Proficient in Python, SQL, machine learning, and computer vision, with hands-on projects in fake news detection, real-time motion detection, and sales analytics on Amazon, Walmart, and Ola datasets. Recipient of the INSPIRE MANAK Award (Government of India) and International Robotics Competition participant, with a product-first, startup mindset. Seeking internship opportunities in AI/ML, data analytics, and software development.

EDUCATION

Vishwakarma Institute of Technology, Pune

2026 – 2030

B.Tech — Computer Science & Engineering (AI & ML)

Choithram School, Manik Bagh, Indore

2014 – 2026

Senior Secondary (Class XII) — PCM (Physics, Chemistry, Mathematics) — 90%

Secondary (Class X) — 91%

SKILLS

Languages & Tech: Python, JavaScript, SQL, HTML5, CSS3, C++, Express.js, REST APIs, Bootstrap, MySQL, Firebase, Tkinter

AI & Machine Learning: Machine Learning, Artificial Intelligence, Natural Language Processing (NLP), OpenCV, Scikit-learn, Pandas, NumPy, Data Mining, LLM Concepts, TensorFlow, Speech Recognition

Developer Tools: Git, GitHub, VS Code, Figma (Basic)

Professional: Problem Solving, Teamwork, Leadership, Communication, Research Skills, Project Management, Software Testing, Time Management, Creativity & Innovation, Web Content Writing, Graphic Design, Creative Writing, Data Visualization

MAJOR PROJECTS

XAKA — Luxury Fashion E-commerce Platform

2025

React, JavaScript, HTML, CSS

- Designed and developed a premium fashion platform with a luxury-first user experience
- Built reusable, responsive frontend components optimized for performance and scalability
- Planned an e-commerce-ready architecture with modern UI/UX principles and conversion-focused design

Fake News Detection System

2025

Python, Scikit-learn, Pandas, NLP

- Developed a machine learning application to classify news articles using Natural Language Processing
- Implemented text preprocessing, feature extraction, and supervised learning algorithms
- Built a modular prediction pipeline supporting future experimentation and model improvements

Zepto Sales & Business Analytics Dashboard

2025

Python, SQL, Pandas, Data Visualization

- Performed exploratory data analysis on retail and sales datasets to identify customer behavior and business trends
- Built dashboards and visual reports for revenue, product performance, and operational insights
- Applied data cleaning, transformation, and analytical techniques to support data-driven decision-making

Amazon Sales Analysis

2026

Python, Pandas, NumPy, Matplotlib, Seaborn

- Performed end-to-end exploratory data analysis on an Amazon sales dataset, including data cleaning, missing-value handling, duplicate removal, and data type conversion
- Analyzed sales distribution, product category performance, order status, state-wise sales, and quantity sold to uncover customer purchasing patterns

- Built bar charts, pie charts, histograms, and correlation heatmaps in Jupyter Notebook to communicate business insights

Walmart Sales Data Analysis (Python + SQL)

2026

Python, MySQL, Pandas, SQLAlchemy, Jupyter

- Built an end-to-end analytics pipeline: sourced data through the Kaggle API, cleaned it with Pandas, and loaded it into MySQL using SQLAlchemy
- Wrote advanced SQL using window functions and CTEs to analyze branch performance, category profitability, payment preferences, and peak shopping shifts
- Identified branches with year-over-year revenue decline and compared category ratings across branches to surface actionable business insights

Ola Ride Data Analysis (SQL)

2026

SQL, MySQL, MySQL Workbench

- Analyzed 103,000+ Ola ride booking records to measure ride success rate, customer and driver cancellations, and vehicle-wise performance
- Wrote SQL queries using filtering, aggregation, GROUP BY, and ORDER BY to compute average ride distance, customer ratings, and total booking value of successful rides
- Created reusable SQL views for payment-method, cancellation, and incomplete-ride reporting

Real-Time Motion Detection System

2026

Python, OpenCV, Imutils

- Built a real-time motion detection system that uses a webcam feed and OpenCV to detect movement and highlight it with bounding boxes
- Implemented a computer-vision pipeline of grayscale conversion, Gaussian blur, frame differencing, thresholding, dilation, and contour detection
- Applied minimum-area filtering to reduce false detections caused by noise and display live motion status

Netflix SQL Data Analysis

2025

SQL, MySQL

- Conducted comprehensive SQL analysis on Netflix datasets using advanced queries
- Utilized joins, aggregations, window functions, and data transformation techniques to uncover business insights
- Strengthened SQL proficiency through real-world analytical problem-solving

SynapseOS AI — AI Productivity & Knowledge Management Platform (Ideation Stage)

2025–2026

Python, Artificial Intelligence, LLM Concepts, Automation

- Designed an AI-powered productivity platform focused on intelligent workflow automation and knowledge management
- Architected a scalable system for AI-assisted task organization and personalized productivity
- Explored Large Language Model (LLM) integration for intelligent automation and user assistance
- Built with a modular design to support future expansion and advanced AI capabilities

LEADERSHIP & CO-CURRICULAR

School Prefect — Choithram School, Manik Bagh, Indore

2024 – 2025

- Represented the student body and coordinated academic and extracurricular initiatives
- Worked closely with faculty to organize school events and maintain student discipline
- Strengthened leadership, communication, and decision-making skills

Member — School Innovation Council (SIC), Choithram School

2023 – 2025

- Collaborated on innovation-driven projects under the School Innovation Council
- Participated in idea generation, research, and technology-focused activities
- Contributed to innovation awareness and entrepreneurship initiatives within the school

Member — Entrepreneurship Cell (E-Cell), Choithram School

2022 – 2023

- Served in the Administration Department of the Entrepreneurship Cell
- Assisted in organizing entrepreneurship events and innovation programs
- Supported operational planning and event coordination

Active Member — Bharat Scouts & Guides

*Class I – Class VI
(Approx. 6 Years)*

- Participated in community service, outdoor learning, leadership camps, and team activities
- Developed discipline, responsibility, teamwork, communication, and problem-solving skills through regular training

and activities

- Contributed to social service initiatives while building resilience and leadership from an early age

ACHIEVEMENTS & COMPETITIONS

INSPIRE MANAK Award — Government of India

2024–2025

- Awarded a research grant of ₹10,000 to develop the submitted innovation further
- Recognized by the Government of India for innovation and creative problem-solving
- Selected under the Government of India's INSPIRE MANAK initiative for innovative thinking and project development

International Robotics Competition (IRC) — Participant

2024

- Participated in an international-level robotics competition
- Applied engineering concepts, teamwork, and technical problem-solving

ISRO Space Quiz Competition — Top 200 Nationwide

2024

- Ranked among the Top 200 participants across India in the ISRO Space Quiz Competition
- Earned an exclusive educational visit to ISRO facilities for outstanding performance
- Awarded a cash prize in recognition of excellence in space science and scientific aptitude

Samsung Solve for Tomorrow (India) — Participant

2024–2025

- Participated in Samsung's national innovation program focused on solving real-world problems through technology and design thinking
- Collaborated on developing innovative solution concepts with an emphasis on social impact and entrepreneurship

Artificial Intelligence & Innovation Programs

2023–2025

- Participated in AI, innovation, and technology-focused workshops and school initiatives
- Gained exposure to emerging technologies, design thinking, and real-world problem-solving through hands-on learning experiences

CERTIFICATIONS & PROGRAMS

SQL Certification

July 2026

- Completed comprehensive SQL certification covering advanced queries, joins, aggregations, and data analysis

Introduction to Quantum Computing

June 2026

- Completed introductory program covering quantum computing fundamentals and principles

Machine Learning Certification

2025

- Completed machine learning certification covering supervised and unsupervised learning algorithms

Claude Code 101

July 2026

- Completed foundational training on Claude Code for AI-assisted software development

Artificial Intelligence (School Course)

2022–2026

- Completed school-level AI program covering foundational AI concepts and applications

AREAS OF INTEREST

Artificial Intelligence • Machine Learning • Full Stack Development • Software Engineering • Product Development • Startup Building • Data Analytics • Automation • Cloud Computing • Human-Centered Technology

LANGUAGES

- English (Professional Proficiency)
- Hindi (Native Proficiency)
- German (Intermediate)

CAREER HIGHLIGHTS

- INSPIRE MANAK Award Recipient (Government of India)
- International Robotics Competition (IRC) Participant
- ISRO Space Quiz Competition / Top 200 Nationwide

- AI Developer passionate about startups and product development
- Built 7+ AI, Machine Learning & Full Stack Development Projects
- School Prefect (2024–2025)
